

- Investment in the Fund involves risks and a possible loss to the principal amount invested. Principal risks include (but not limited to) market, political, regulatory risks, price volatility, currency fluctuations and derivatives exposure risks.
- The Fund is exposed to risks relating to sector or market concentration and therefore has higher price volatility and liquidity risk than funds which have a more diversified policy.
- The Fund may invest in warrants on transferrable securities (up to 10% of its net assets) and therefore has higher price volatility than funds that invest in the underlying assets.
- The investment decision is yours but you should not invest unless the intermediary who sells the Fund to you has advised you that it is suitable for you and has explained why, including how buying it would be consistent with your investment objectives. You should not base on this document alone to make your investment decisions.

## Investment Objective

The objective of the Fund is to invest on a permanent basis a minimum of 75% of its net assets in European equities (including Iceland and Norway) that may offer a return which is higher than Eurozone's market average.
